With increasing regulatory pressures, the rise of digital assets, and the demand for faster and more efficient settlement cycles, it is imperative that institutions adopt solutions that enable them to remain competitive and compliant.

InteliClear 2.0 allows for advanced AI-driven functionalities, enabling institutions to automate complex post-trade workflows, enhance real-time data analytics, and ensure predictive compliance—empowering firms to optimize operations, reduce errors, and scale efficiently in an increasingly complex environment.

InteliClear 2.0 introduces cutting-edge enhancements specifically designed to address these challenges,
providing the financial services industry with the tools needed to navigate the complexities of the
modern market with greater agility and confidence.

John Paul DeVito, Co-Founder of InteliClear, shared his enthusiasm about the launch:

"InteliClear 2.0 represents a pivotal advancement in post-trade processing. Through close collaboration
with market participants, we developed features that not only enhance performance but also provide

unparalleled flexibility and customization. This new version is engineered to empower financial institutions to navigate today's dynamic market environment with increased efficiency and precision. We
believe that InteliClear 2.0 will be instrumental in helping our clients stay ahead of industry challenges
and seize new opportunities."
